08/2023 – 05/2024
Sniper Project is a ride-hailing application that aids visually impaired individuals and busy parents with shared transportation. It employs AI to identify vehicle plates upon arrival by opening the camera. The project provides a children's delivery service and an ESP32 camera in the driver's car for seamless live video streaming to track children during trips, ensuring security. With a 97.9% accuracy rate in recognizing a car's plate, it provides reliability and user-friendliness.
